

Financial Fraud Investigation Reasoning Engine (FFIRE)

Software Requirements Specification (High-Level Outline)

Vision

Enterprise-grade explainable financial fraud investigation platform using LangGraph, multi-step reasoning, retrieval, validation and grounded AI.

Chapters

1. Introduction
2. Literature Review
3. Problem Statement
4. Objectives
5. Architecture
6. LangGraph Execution Graph
7. Module Design
8. DFDs
9. ER Diagram
10. Database Schema
11. Sequence Diagrams
12. Use Cases
13. State Machine
14. Activity Diagram
15. Component Diagram
16. Deployment Diagram
17. Security
18. Reasoning Strategy
19. Prompt Engineering
20. Guardrails
21. Risk Scoring
22. API Specification
23. Frontend Design
24. Future Scope
25. Conclusion

Diagrams

ER Diagram, DFD Level 0/1/2, Use Case, Activity, Sequence, State Machine, Component, Deployment, Class Diagram, LangGraph Execution Graph, Investigation Pipeline.

Theme

Papercraft design with blue/cyan fintech palette, layered paper styling, modern icons, rounded cards, and color-coded diagrams.

Note: This PDF is a project outline. A complete 30–40 page SRS with professionally designed diagrams requires iterative document creation.
